## Overview

Looking into the future, as passenger traffic continues to grow and the fleet expands rapidly, digital technologies represented by big data and artificial intelligence gradually enter the civil aviation field, and the promotion of new flight operation concepts has become a major trend in aviation operations.

On August 25-26, The 7<sup>th</sup> Annual China Aviation Training International Forum 2022 was successfully held in Langfang City, Hebei Province. The forum was hosted Civil Aircraft Operation Support Technology Sub-committee of CSAA, Shanghai Society of Aeronautics, supported by Langfang Municipal People's Government, Beijing Daxing International Airport Economic Zone (Langfang) Administrative Committee, Langfang Region to Beijing Daxing International Airport of China (Hebei)

Pilot Free Trade Zone Administrative Committee, and organized by Hebei Airport Economic Zone Group Co., Ltd, Civil Aviation University of China, COMAC Shanghai Aircraft Customer Service Co., Ltd and Galleon (Shanghai) Consulting Co., Ltd.

With the theme of "New Situation, New Era, New Technology -Empower New Generation of Flight Training System Construction", the forum was jointly organized by government leaders, airlines, OEMs, simulator companies, advanced technology suppliers and other related units. Through keynote speeches, interactive discussions, exhibitions and one-on-one business negotiations, the conference promoted mutual exchanges among decision makers in the industry. 20 domestic and foreign famous airline companies and industry experts discussed the construction of a whole life cycle management system for pilot skills, training methods based on core competencies, hotspots of aircraft operation, and technical issues for the next generation training system.

We are glad to see that this conference has made a deep impression on delegates and has been well received by all parties. The forum builds a forward-looking, open and characteristic communication platform as well as a platform for information sharing and professional cooperation for practitioners and researchers. In the end, we would like to extend our sincere thanks to hosts, sponsors, association and media partners.
