# ■ Overview |

The aviation emergency rescue system is not only a crucial component of the modern emergency response framework but also a significant growth driver for the high-quality development of the low-altitude economy. In recent years, China has placed great emphasis on the construction of its aviation emergency rescue system. By focusing on pathways to integrate aviation emergency rescue with the growth of the low-altitude economy, remarkable achievements have been made.

On June 12<sup>th</sup>-13<sup>th</sup>, The 3<sup>rd</sup> Aviation Emergency Rescue Annual Conference 2025 was successfully held in Tianjin City. The conference was hosted by Emergency Rescue Branch, CSAA, Shanghai Society of Aeronautics., supported by Chinese Society of Aeronautics and Astronautics, organized by Beihang University, China Helicopter Research and Development Institute, Galleon (Shanghai) Co., Ltd.

The conference lasted for two days, focusing on the theme of “Mission-Oriented and All-Domain Collaboration: Constructing a New Era National Aviation Emergency Rescue System”. A total of 19 keynote speeches were delivered, accompanied by 1 panel discussion, attracting the participation of more than 60 enterprises, and nearly 200 representatives from emergency-related agencies and bureaus, various emergency rescue centers, host factories, aviation schools, general aviation units, technical vendors participated in the meeting to promote the development of aviation emergency rescue industry.

Participants said that through this event, they further understood the current hot spots of aviation emergency rescue industry, met new partners and found new business opportunities. We hope to add to the development of China's aviation emergency rescue industry by building a platform for technical exchanges, strengthening the interaction between buyers and suppliers, actively solving the problems in the development of the industry through the collision of ideas, and helping the industry to develop steadily.
