# Overview

As the world's second largest aviation market, China is playing an increasingly important role in the global aviation industry chain, especially after the major breakthroughs in the development of a number of domestically produced civil aircraft, China's aviation industry, whether in terms of technological innovation, industrial upgrading or market competitiveness, are rapidly catching up with the international advanced level. In this process, aviation digital technology, as the core force to promote industrial innovation and enhance competitiveness, will play a pivotal role.

The 7th Annual Aviation Digital Connectivity Technology Congress was successfully held on 17th-18th, April in Jinan City, Shandong Province. The congress was co-hosted by Shanghai Society of Aeronautics, COMAC Information Center and Shandong Society of Aeronautics and Astronautics, supported by Chinese Society of Aeronautics and Astronautics, Commercial Aircraft Corporation of China Ltd. and Jinan Innovation Zone - Airport Economic Zone, co-organized by Civil Aircraft Operation Support Technology Sub-committee of SSA and Digital Technology Sub-committee of SSA, organized by Jinan High - Tech Park Development Group co., Ltd., Taikoo (Shandong) Aircraft Engineering Co., Ltd. (STAECO) and Galleon (Shanghai) Information Consulting Co., Ltd.

A total of 16 experts and scholars made presentations, 16 speeches were delivered and 1 panel discussion was organised, attracting more than 60 enterprises to participate, with more than 200 representatives from domestic and foreign airlines, MRO companies, OEMs, system integrators, satellite communications, interconnection plus modification suppliers, avionics system suppliers and other companies attended the meeting to jointly promote the development of aviation digital interconnection technology system.

Participants said that through this event, they further understood the current hot spots of Aviation Digital Connectivity industry, met new partners and found new business opportunities. We hope to add to the development of China's Aviation Digital Connectivity by building a platform for technical exchanges, strengthening the interaction between buyers and suppliers, actively solving the problems in the development of the industry through the collision of ideas, and helping the industry to develop steadily.
