■ Overview |

On September 9th-10th, The 30th Line Maintenance and Material Support Conference was successfully held in Inner Mongolia, Ordos. The conference was rotating chaired by Genghis Khan Airlines, hosted by Shanghai Society of Aeronautics, supported by Chinese Society of Aeronautics and Astronautics and Civil Aviation Maintenance Association of China, co-organized by Shanghai Wujing Economic Development Co., LTD., Shanghai Wujing Science Park Management and Development Co., LTD., organized by Ordos Airport Administration Group Co., Ltd. And Galleon (Shanghai) Consulting Co., Ltd.

The two-day conference centred on the theme "Strong Chain & Smart MRO - Jointly Building Future New Ecosystem for Aviation Maintenance." It featured 16 keynote presentations and three panel discussions, attracting participation from over 150 enterprises. Nearly 500 representatives attended, representing government regulatory bodies, international organisations, domestic and international airlines, aviation maintenance enterprises, aircraft manufacturers, aerospace component suppliers, testing technology providers, research institutes, and related sectors.

Participants said that through this event, they further understood the current hot spots of line maintenance and material support industry, met new partners and found new business opportunities. We hope to add to the development of China's line maintenance and material support industry by building a platform for technical exchanges, strengthening the interaction between buyers and suppliers, actively solving the problems in the development of the industry through the collision of ideas, and helping the industry to develop steadily.
